

Construction Management Software Solutions

SBS Group builds its construction management software solutions on a technology framework that utilizes construction best practices and 24 years of industry experience. Our construction software solutions deliver tight audit controls, unmatched project visibility, faster reporting and proactive project alerts. It is tailored for general and specialty contractors facing the demands of razor thin margins, smaller project portfolios and increased competition.

With flexible project management, job costing, tightly controlled accounting, material and resource management, streamlined field service operations, and accurate, up-to-date information, your business can deliver superior results - for every project or work order - every time.

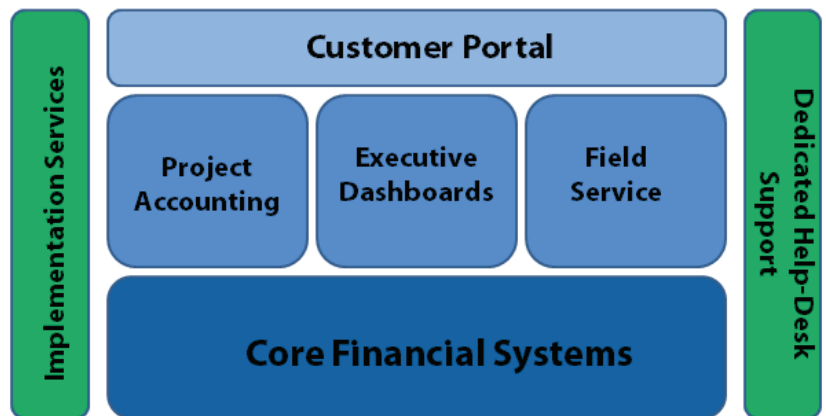

An integrated solution that provides you:

Visibility & Accountability - unparalleled tracing and visibility into projects and budgets, with audit trails and capabilities to drill down into details of individual transactions.

Accurate, Real-Time Data - instant insight into the health of your current projects with accurate, up-to-the-minute information

Faster Reporting - lightning-fast reporting capabilities and reduced steps for faster and easier month-end closings

Centralized Documentation - secure central storage of project documentation for faster access, more organized and standardized documents

We specialize in providing construction solutions to General and Specialty Contractors, HVAC and Electrical Contractors and Design-Build Contractors.
